DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, 57, 58, and 101-113, drawn to a method of presenting travel service availability, classified in class 705, subclass 5.
 - II. Claims 4, 5, drawn to a method of generating an accounting record, classified in class 705, subclass 30.
 - III. Claims 6-12 and 24-42, drawn to a method for providing the cost of performing a transaction, classified in class 705, subclass 400.
 - IV. Claims 13-23, drawn to a method providing prices for an event, classified in class 705, subclass 27.
 - V. Claims 43-56, drawn to a method of method of providing a ticket associated with a transaction, classified in class 705, subclass 24

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III, IV and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as displaying the availability of a travel service based on a user request. Invention II has separate utility such as creating an accounting record associated with a travel service request. Invention III has separate utility such as displaying the cost for

performing a transaction based on a user's parameters. Invention IV has separate utility such as displaying prices for an item from different sources. Invention V has separate utility such as providing a ticket/receipt for a transaction. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
